

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Thirty-third Middlesex Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2003.

Residents of Thirty-third Middlesex Representative District

Characteristics of Admissions

In FY 2003, there were 115,896 admissions to licensed substance abuse treatment services in all of Massachusetts; less than one percent (868) of these admissions reside in the Thirty-third Middlesex Representative District. 1% (11) of admissions from the Thirty-second Middlesex Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2003, admissions to all residential and outpatient substance abuse treatment services from the Thirty-third Middlesex Representative District reported the following characteristics:

- 66% were male and 34% were female.
- 63% were between the ages of 21-39.
- 85% were white non-Latino, 5% were black non-Latino, 4% were Latino, and 5% were other racial categories.
- 72% were never married, 12% were married, and 16% reported not to be married now.
- 24% had less than high school education, 58% completed high school, and 18% had more than high school education.
- 25% were employed.
- 11% were homeless.
- 25% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Thirty-third Middlesex Representative District.

Table 1					
Primary Drug by District and State FY 2003					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	31%	45%	3%	4%	1%
State	43%	38%	6%	4%	4%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2003 Thirty-third Middlesex Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	753	602	227	257	160	221	145
FY '96	670	483	207	217	164	225	146
FY '97	682	531	198	186	107	220	153
FY '98	759	569	194	225	103	277	174
FY '99	726	518	200	195	92	279	205
FY '00	659	443	182	189	85	266	199
FY '01	674	444	159	163	59	288	203
FY '02	874	524	185	193	61	451	284
FY '03	868	501	196	218	83	433	308
